## UNIT 1 GRAMMAR 1

### 1. TYPES OF SENTENCES

**1. Declarative sentences:** A declarative sentence makes a statement or declares something. It is used to share information and always ends with a period. Structure: Subject + verb + object  
Example: The girl lost her favorite doll. Declarative sentences can be positive or negative.  
Positive: "Jessica likes history lectures." Negative: "Jessica does not like history lectures."

**2. Interrogative Sentences:** Interrogative sentences are designed to ask questions and always end with a question mark(?) Structure: • (Wh-word or how) + auxiliary verb + subject Example: "Where is Kate?" Like declarative sentences, they can be positive or negative: Positive: "Does Jessica like history lectures?" Negative: "Doesn't Jessica like history lectures?"

**3. Imperative Sentences:** Imperative sentences give commands or instructions. They can end with either a period or an exclamation mark, depending on the context. Structure: • Base verb + additional details (often lacks a subject as the command is directed at the reader/listener). Example: "Attend history lectures!" Imperative sentences can be positive or negative: Positive: "Join a football team." Negative: "Don't join a football team."

**4. Exclamatory Sentences:** Exclamatory sentences express strong emotions like surprise or excitement and always end with an exclamation mark (!) Example: "There are so many students here!" Structure: • What (+ adjective) + noun + subject + verb • How (+ adjective/adverb) + subject + verb Example: "What a wonderful day!" or "How generous you are!"

**Exercise: Identify the following sentences.**

1. The sun rises in the east.
2. I'm so excited to see you!
3. Close the door.
4. What is your name?
5. The capital of France is Paris.
6. What a wonderful day!
7. Don't touch that!
8. She is a doctor.
9. Where are you from?
10. Please pass the salt.
11. Wow, what a beautiful view!
12. How old are you?
13. The meeting starts at 2 PM.
14. What time does the movie start?
15. Please be quiet in the library.
16. Wow, that's an amazing view!
17. Can you pass the salt?

## 2. MODAL VERBS

A modal verb (also called a modal auxiliary verb) Modal verbs come before main verbs and never change their form. They express possibility, ability, permission, or necessity. (Can, could, will, would, shall, should, may, might, have to, ought to)

**Exercise 1: Identify the modal verb in the following sentences.**

1. You \_\_\_\_\_ (can/must) speak French fluently to work here.

## 3. CONJUNCTIONS

A conjunction is a word that is used to connect words, phrases, and clauses. There are many conjunctions in the English language, but some common ones include and, or, but, because, for, if, and when. There are three basic types of conjunctions: coordinating, subordinating, and co-relative.

There are three basic types of conjunctions: coordinating, subordinating, and co-relative.. Examples: Because the pop star caught a terrible cold, her upcoming performances in Boston and Chicago were indefinitely postponed. The tour organizers provided neither rescheduled dates nor refunds for the tickets, causing much discontent among the fans. Coordinating conjunctions Coordinating conjunctions are used to connect two nouns, two verbs, two adjectives, two phrases, or two independent clauses that are grammatically equal. There are seven coordinating conjunctions in English, that you can remember them using the mnemonic device **FANBOYS**: for, and, nor, but, or, yet, so.

**Examples:**

1. The data was gathered through questionnaires and interviews.
2. I don't like to run or swim.
3. He was clever but lazy.
4. The dog wagged his tail and panted excitedly.

5. The results were undeniably intriguing yet ultimately inconclusive.
6. She usually studies in the library or at a cafe.

**Exercise: Fill in the blanks with suitable conjunctions.**

1. I like reading books \_\_\_\_\_ watching movies.
2. I wanted to go to the beach \_\_\_\_\_ it was raining.

13. We are lost \_\_\_\_\_ need to ask for directions.
14. I love reading \_\_\_\_\_ I don't have much time.
15. It is cold \_\_\_\_\_ he wants to wear a jacket.

#### 4. CONCORD

In grammar, "concord" refers to the agreement or correspondence between different elements of a sentence, such as subject-verb agreement, pronoun-antecedent agreement, or noun-adjective agreement. It ensures that the different parts of a sentence fit together logically and grammatically. For example:

**1. Subject-Verb Concord:** The verb in a sentence should agree with its subject in number and person. For instance, "She sings" (singular subject "she" with singular verb "sings") and "They sing" (plural subject "they" with plural verb "sing").

**2. Pronoun-Antecedent Concord:** Pronouns must agree with their antecedents in number, gender, and person. For example, "John has lost his keys" (John is the antecedent of the pronoun "his") and "They are happy" (plural antecedent "they" with plural pronoun "they").

**3. Noun-Adjective Concord:** Adjectives should agree with the nouns they modify in number, gender, and case. For example, "The red car" (singular noun "car" with singular adjective "red") and "The red cars" (plural noun "cars" with plural adjective "red").

##### Rule 1:

The verb and subject must agree in number (singular or plural). This means that subject is singular, the verb should be singular and if the subject is plural, the verb should be plural.

For example,

1. He plays football. (SINGULAR)
2. They play football. (PLURAL)

**Rule 2:**

The number of the subject (singular or plural) will not change due to words/phrases between the subject and the verb.

For example,

1. One of the glasses is empty. (Here, since the subject is 'one', the verb should be 'is'.)
2. The bouquet of red roses smells so sweet. (Here, since 'bouquet' is the subject and 'roses', the verb should be 'smells' and not 'smell'.)

**Rule 3:**

Subjects, that are joined by 'and' in a sentence use a plural verb. Subjects that are joined by 'either/or' and 'neither/nor' use a singular verb.

For example,

1. Radha and Meera are coming home.
2. Neither Akshay nor Rohit is coming home.
3. My dad or my mom is arriving today.

**Rule 4:**

The verb in a sentence containing 'or', 'either/or', 'neither/nor' agrees with the noun or pronoun closest to it.

For example,

1. Neither the shoes nor the bag matches the dress. (Here, 'bag' is closest to the verb, hence 'matches'.)
2. Neither the bag nor the shoes match the dress. (Here, 'shoes' is closest to the verb, hence 'match'.)

**Rule 5:**

When the subject is followed by words such as 'as well as', 'along with', 'besides', 'not', etc. ignore them and use a singular verb if the subject is singular.

For example,

1. Matt, as well as his dog, is expected shortly.
2. Pratik, along with his brother, is going to school.

**Rule 7:**

In sentences that include sums of money, periods of time or distances, etc. (as a unit), use singular verbs. For example,

1. 500 rupees is a high price to pay
2. 62 years is the minimum age of retirement.

3. 10 kilometers is too far to walk.

**Rule 8:**

In the case of words such as 'a lot of', 'all', 'some', etc. in a sentence, we should pay attention to the noun after 'of'. If the noun used after 'of' is singular, then use a singular verb; if plural, use a plural verb. For example,

1. All of the cake is gone.
2. All of the cakes are gone.
3. A lot of the cake is gone.
4. A lot of the cakes are gone.
5. Some of the cake is gone.
6. Some of the cakes are gone.

**Rule 9:**

In the case of collective nouns such as 'group', 'population', 'family', etc. in a sentence, the verb can be singular or plural depending on their use in the sentence.

For example,

1. Most of my family is here OR are here.
2. Half of the population was against the bill OR were against the bill.

**Rule 10:**

Nouns such as 'mathematics', 'civics', 'news', etc., while plural in form, are singular in meaning and use singular verbs.

For example,

1. Mathematics is very difficult for some people.
2. The news is very saddening.

**Rule 11:**

In sentences that express a wish, request or contrary to fact, the word 'were' is used instead of 'was'.

**EXERCISE 1**

**Choose the correct subject verb combinations in the sentences below:**

- (a) The lady in the car (look/looks) like your mother.
- (b) Most of the milk (is/are) gone.
- (c) One of the flowers (has/have) wilted.

## UNIT-II

### 1. TENSES

Tenses are used to indicate when an action takes place. Here's a breakdown of the most common tenses in English, along with examples:

**Simple Present:** Used for habitual actions, general truths, and future schedules. I play tennis every Saturday. The sun rises in the east. The train leaves at 2 PM tomorrow.

**Simple Past:** Used for completed actions in the past. She ate dinner last night. They lived in Mumbai for five years.

**Simple Future:** Used for future actions. We will visit Paris next summer. I will finish my homework later.

**Continuous Tenses**

**Present Continuous:** Used for ongoing actions happening now or around now. I am watching TV right now. It is raining outside.

**Past Continuous:** Used for ongoing actions in the past. They were playing basketball when the phone rang. I was studying yesterday evening.

**Future Continuous:** Used for ongoing actions in the future. We will be having dinner at 7 PM tomorrow. I will be working on my project next week.

**Perfect Tenses**

**Present Perfect:** Used for actions completed in the past but with a connection to the present. I have already eaten breakfast. She has lived here for ten years.

**Past Perfect:** Used for actions completed before another action in the past. He had finished his work before the meeting started. We had eaten dinner before we went to the movies.

**Future Perfect:** Used for actions completed before a specific time in the future. I will have finished my assignment by tomorrow. They will have arrived before the party starts.

**Perfect Continuous Tenses**

**Present Perfect Continuous:** Used for actions that started in the past and are still continuing. I have been waiting for him for an hour. It has been raining all day.

**Past Perfect Continuous:** Used for actions that started in the past, continued for some time, and stopped before another action in the past. He had been working hard for months before he got a promotion. They had been living in the city for five years before they moved to the countryside.

**Future Perfect Continuous:** Used for actions that will start in the future, continue for some time, and stop before a specific time in the future. I will have been studying for four hours by the time you arrive. They will have been living here for ten years by next year.

**Note:** These are just the most common tenses. There are also other tenses, such as the Present Perfect Progressive and the Past Perfect Progressive, which are used less frequently.

## 2. QUESTION TAGS

Question tags are short questions added to the end of statements to confirm or seek agreement. They are typically formed using an auxiliary verb or modal verb from the main statement and the appropriate pronoun.

**General Rules:** Positive statements have negative question tags: He is a doctor, isn't he? Negative statements have positive question tags: She doesn't like coffee, does she? Imperative sentences use "will you" or "won't you": Close the door, will you? "Let's" statements use "shall we": Let's go to the park, shall we?

**Examples of Question Tags:**

**Present Simple:** You like pizza, don't you? They don't play football, do they? **Present Continuous:** She is studying, isn't she? We aren't late, are we?

**Past Simple:** He lived in Paris, didn't he? They didn't go to the party, did they?

**Past Continuous:** You were sleeping, weren't you? We weren't watching TV, were we?

**Present Perfect:** She has finished her homework, hasn't she? They haven't eaten dinner yet, have they?

**Past Perfect:** He had left before I arrived, hadn't he? They hadn't seen the movie, had they?

**Future Simple:** We will go to the beach tomorrow, won't we? They won't be late, will they?

**Future Continuous:** You will be studying tomorrow, won't you? They won't be sleeping, will they?

**Future Perfect:** He will have finished his work by then, won't he? They won't have eaten dinner yet, will they?

**Imperative:** Close the door, will you? Don't touch that, will you? **Let's:** Let's go to the park, shall we? **Uses of Question Tags:**

**To confirm or seek agreement:** You like coffee, don't you?

**To express surprise or disbelief:** She is a doctor, isn't she?

**To show interest or engage in conversation:** You live in London, don't you?

**To request confirmation or clarification:** You said you would be here at 2, didn't you?

### **SENTENCE COMPLETION**

Sentence Completion is a common test item in most competitive exams. A sentence contains one or two blanks (usually), to be filled in using the choices. These questions test your vocabulary and knowledge of the finer distinctions among words. A good vocabulary can be a great help here. But you can use many strategies for these questions, even without knowing all the choices.

Strategies for Sentence Completion:

**1. Read the Sentence**

Use the sentence clues by reading the sentence thoroughly. Two things make a question difficult: difficult words and sentence structure. If you cannot dissect a sentence to figure out what fits best, you CANNOT crack the question though you know the word meanings. We need to properly take apart the sentences and improve our vocabulary.

**2. Hints**

The hints indicate what should go into the blank for the sentence to make sense. Here's a test to locate the right hint: if you change the hint, the choice in the blank MUST be changed. Often, you can use the hint by putting that word or phrase into the blank itself.

**3. Pluses and Minuses**

Once you find the word clues, indicate the kind of word you're looking for with a + (positive meaning) or - (negative) sign. Also, to indicate synonyms or antonyms, you can use these symbols.

**4. Structure Words**

Look for words like but, rather, although, however, and, while, but, therefore

They reveal the sentence organization and the hint-blank relationship. They tell you what kinds of words to look for as they change the thought process in the sentence.

### 5. Visualize

Before you go to the choices, think of the possible words for the blanks. It will save you from wrong choices. If you know roughly the KIND of words needed, the elimination is much easier. The word you visualize doesn't have to be fancy – a general idea is fine. This is better than trying out the choices to find out "what sounds good." It is faster and less prone to errors.

### EXAMPLES

A. Neem has \_\_\_\_\_ qualities and in many clinical trials, doctors have saved countless lives by using raw Neem leaves on serious wounds.

remedial  
flavouring  
inferior  
doubtful  
notorious

We need a positive word with a "life saving"-like meaning. Choices C, D, and E are negative and are ruled out. You may be unaware of remedial but you know that "flavouring" doesn't mean anything like life saving. Therefore, the answer is remedial.

B. The much-hated bill sparked off a wave of public \_\_\_\_\_ which could not \_\_\_\_\_ by the concessions the British announced.

enthusiasm...dampened  
clamour...misled  
curiosity...complemented  
adoration...channelized  
discontent...abated

Much-hated indicates a negative choice for the first blank indicating anger or protest here. The second one needs harder thinking; even the British concessions did not "lessen" the public anger. Once you are clear about the word SHADES needed, find the words similar to the ones you had visualized.

### 6. Elimination

Ruling out the wrong choices should be easy now. But remember, BOTH the words have to fit in the given ORDER for the right answer. If one word is a perfect choice but the other one doesn't make sense, the answer is WRONG. DO NOT rule out choices if you don't know their meanings and unless you are sure they do not work. If you have doubts, leave and return after checking the other choices.

## **7. Improve Your Vocabulary**

Improving your vocabulary and usage can help you do better as the words meaning help you find the right answer.

## **8. Working Backwards**

The two-blank questions can be easier as you have more opportunities to eliminate wrong choices. If you can eliminate a choice based on one word, you don't need to know the other word. Often, working BACKWARDS i.e. picking the second blank choice first works better.

Keep the above points in mind while tackling sentence completion questions.

## **4. CONTEXTUAL VOCABULARY**

Contextual vocabulary can be discussed as the measured acquisition of meanings of the word from the paragraph by analysis from contextual signs, previous information, language concerns, as well as theories established from past chances with the test, however without outside sources of support like word dictionaries or scholars.

Note:-The aim of the contextual vocabulary section in English Language is double; one is to progress and apply techniques or tools to describe or outline an indefinite noun, verb, as well as adjective from a structured formation of a sentence, and to create along with set the standard to improve the level of vocabulary.

Rules For Contextual Vocabulary –

Having a strong vocabulary is a must, which helps in leading you to the right choice of words.

Maintain the overall tone and idea of the sentence. It will assist you to mark the opening and closing sentence that further makes aligning easier.

Ensure that you have a thorough knowledge of demonstrative pronouns such as these, those, that, etc. as they are necessary to align the jumbled sentences.

While solving contextual vocabulary questions, having a thorough knowledge of grammar is required in order to align the sentence constructively or appropriately.

Questions based on contextual vocabulary often includes idioms and phrases and a student must have knowledge about the same.

Contextual Vocabulary – Rules and Examples

### **(1) Latin Keywords Method-**

### UNIT-III

## 1. WORD ANALOGY

The word analogy comes from the Greek word for "proportionate", which comes from the Greek word *logos*, meaning "reason". The word analogy (which comes from *analogous*) traces back by way of Latin to a Greek word meaning "proportionate." That word has a root in the Greek word *logos*, meaning "reason." likeness, similarity, resemblance, similitude, analogy mean agreement or correspondence in details. Analogies, literally means a comparison or a comparable similarity. A student has to find a pair of words in the same relation or a similar relation as that of the given pair of words. Therefore, there are two things that are important to attempt a question on analogy: 1. Meaning of all given words. 2. Relationship between the given pairs of words.

#### **Types of analogies**

The word analogy comes from the Greek word for "proportionality." You might see analogies written as proportions, taking the form of "A is to B as C is to D." "Up is to down as on is to off" is an analogy (though not a particularly profound one). This is an example of an identical relationship analogy. The relationship between up and down (they are opposites) is the same as the relationship between on and off. Another type of analogy is a shared abstraction. Commonly found in writing and conversation alike, shared abstraction analogies rely on specific patterns or characteristics to explain meaning. An example is "Raising children requires the same dedication you would give to a garden. Two other types of analogy are persuasive and literal. Persuasive analogies are provided to support an argument. Lawyers—professional arguers—will sometimes create hypothetical situations in order to help members of a jury better grasp the situation at hand. For example, if a new hair growth treatment shows a certain amount of success in mice, it can be extrapolated that it may have similar, analogous effects on humans.

#### **How to write an analogy**

Analogy is an incredibly useful tool for explanation, and we often create analogies in everyday conversation without realizing it. If you want to use analogy in your writing to help convey a message, here are four helpful rules:

- 1 Make sure the imagery you use is familiar and easy to understand. Creating an overly complicated analogy defeats the purpose of using analogy for explanation.

2 Compare and contrast. When you have the two items you want to compare, think through as many of their similarities and differences as you can. You might realize even deeper connections between them that you hadn't thought of yet. Alternatively, you might realize the differences are more prominent than the similarities and the analogy won't work.

3 Think about your audience. If you are writing a personal essay you know your colleagues will read, you can assume your audience has a certain amount of familiarity with your interests. But if you're writing for a general audience, you should simplify your analogy by including more universally familiar topics.

**Consider the following example:**

Pen : Write :: Book : ...?...

Now first determine the relation between the first two words, it is that of purpose, pen is used to write. Then determine the other word which will be in the same relation to the third word. Book is used to read, then:

Pen : Write :: Book : read

### Examples

1. Eye : See :: Ear : Hear (both are senses and their respective functions)
2. Painter : Brush :: Writer : Pen (both are artists and their respective tools)
3. Car : Gasoline :: Human : Food (both need fuel to function)
4. Teacher : Student :: Coach : Player (both are mentors and their respective learners)
5. Book : Library :: Painting : Gallery (both are collections of creative works)
6. Heart : Blood :: Pump : Water (both circulate essential fluids)
7. Computer : Software :: Brain : Thoughts (both process and run on their respective programs)
8. Athlete : Training :: Musician : Practice (both require dedication and repetition to improve)
9. Company : CEO :: Country : President (both are leaders and their respective organizations)
10. Recipe : Cooking :: Blueprint : Building (both are plans and their respective outcome)

**Look at some of the following solved examples. Discuss with your partner why none of the other options is correct.**

Segregate: unify :: repair: \_\_\_\_\_

- a. approach    b. push    c. damage    d. connect

Alphabetical: \_\_\_\_\_ :: sequential: files

- a. sort    b. part    c. list    d. order

## 2. PARA COMPLETION

### What is Para completion?

As the name suggests, Para-completion requires you to complete the paragraph in a way that it is coherent and complete. It tests your comprehension skills. All it asks of you is to complete a missing line from a paragraph, and this line is generally the last line of the paragraph. It is a pretty simple thing to do, isn't it? Well, not quite. Let's understand the concept with help of an example.

### Stepwise Approach for Para-Completion Questions:

**Identify the gist of the paragraph:** This paragraph is about negative character traits of expert individuals and how they are avoided by firms.

**Identify the continuing thread of thought :** The author leaves us at a peculiar place: how companies choose employees that get along well. These cannot be experts because it is not in their nature to get along well. So it has to be people who are not experts. A simple inference we draw.

**Continue the thread of thought keep in mind the 'first thing' :** We continue the inference we have drawn above. People who are not experts are not in a position to drive innovation or become experts. But we cannot say their results will be disastrous as the passage mentions how well they get along. So, we adopt a middle path and the choice that represents this balanced approach, option 2.

### Tips & Tricks for solving Para completion

**Tone of the passage:** When a passage is written it follows a certain tone. This tone will never be changed abruptly. In case there is an option in which the tone of the passage changes bluntly and suddenly, we can easily eliminate the option. In case of change of tone the author will provide certain hints like the usage of words such as - but, however, although, though etc.

**Style of the author:** Every author has different style of writing, for example some authors use a lot of metaphors, simile etc. While other authors use a very simple language. While solving the question make sure that the option matches with the style of the author.

**Key words:** In every paragraph there are certain key words that can be easily identified. If you are able to identify these key words they will help in solving the questions and reaching the appropriate conclusion. Now that we have identified the tricks to solve, let us also look at the tricks for eliminating the options. Do not get stuck on words.] Do not get stuck on the last line. The last line is vastly different from the last thought.] Para-completion in a way is thought completion.

#### 4. SPELLING TEST

##### Note The Following Points About Spellings:

Make sure you have spelt all the words in your document correctly. Be especially careful about words that are often spelt wrong, for example: 'committment' for 'commitment', 'ocassion' for 'occasion' and 'acheive' for 'achieve'. Personal computers have software packages with spell-check, which can be pre-set for American or British spelling. But when in doubt about whether you have used the right word for the sense intended, it is best to look it up in a dictionary. For example, in the sentence 'The increase in fuel price will affect the share market', the appropriate word in place of 'effect' is 'affect'.

Many people in India prefer British to American spellings, for example: 'paediatrician' instead of 'pediatrician', 'honour' instead of 'honor', 'fulfil' instead of 'fulfill' and 'litre' instead of 'liter'. You must make a careful decision on the style you want to follow and be consistent in using it. Some words are spelt in two different ways in British English, for example 'organize' and 'organise', and 'visualization' and 'visualisation'. Make your choice according to personal preference and sometimes that of the person or organisation you represent and then be consistent in using the style throughout your letter or report or proposal.

It is very important to spell the names of people correctly. When there is more than one way of spelling a name, finding out how someone spells his/her name is polite and shows that you care: Neeta or Nita, Latha or Lata and Ahmad or Ahmed.

##### Capital Letters

- One of the important things you have to check while writing a document is to check if you have used capital (or upper-case) letters correctly. Besides using it for the first letter of the opening word of a sentence, there are other conventions for the use of capital letters. You may know these, but let us run through them so that you are clear.
- Capitalise the first letters of names of people (both first names and surnames and initials, if any) and places (such as streets, villages, cities, countries, hotels, parks, hospitals and buildings): Sushant Joshi, V. S. Yusuf, Nehru Marg, Shirdi, Mumbai, Surya Inn, Lumbini Park, Asia Hospital and Minerva Complex.
- The first letters of nationalities and language or religious groups are capitalised: Indian, Japanese, Muslim, Jew, Hindi, Spanish and Spaniard.
- The names of the days of the week and the months of the year begin with capital letters: Sunday, March. The names of holidays, religious festivals and sporting events are

capitalised:

- Martyrs Day, Ramzan and the French Open.
- All the words (except articles, prepositions and conjunctions) in full names of schools, colleges, universities, departments and other organisations begin with a capital letter: Shishu Kindergarten, Vimala College, Pune University, the Department of Foreign Affairs, the Ministry of Commerce and Industry, the Andhra Bank and the 76 Government of India. But when institutions, departments or governments are referred to only by the names of the class they belong to, the current practice is to use lowercase initial letters: the department, the school, the ministry, the government and the bank.
- Names of brands of bicycles, cars and other vehicles always start with a capital letter: Maruti, Boeing 747 and Hercules.
- Capital letters are also used for the names of particular trains, ships and spacecraft: Rajdhani, Vikrant and Apollo.
- Some words are usually upcased, especially in official writing: the Bar, the Chair and the Bench.
- Official titles are always capitalised when used in their full forms or when used in apposition with names of the people: the Prime Minister of New Zealand, the Archbishop of Kolkata, the Chairman of Bhima Textiles; also Chief Engineer, Ms Reema Kulkarni and the Registrar, Dr D'Souza. But in present-day writing, titles that are not in their full forms are often written in the lower case: 'The general manager is in a meeting' and 'He met the president and the secretary at the party office.'
- Names of degrees, awards and prizes always start with a capital letter: Bachelor of Economics, MBA and Nobel Prize.
- All terms of address begin with capital letters: Dear Ladies and Gentlemen/ Sir/Mother, etc.
- The initial letters of all words except prepositions, conjunctions and articles in full names of conferences and seminars are capitalised, but they appear in lowercase in shortened versions of the name or if the words 'seminar' and 'conference' are used by themselves: the Chennai Conference on Alternative Energy Resources, but the Chennai energy resources conference and the conference discussed...
- Abbreviated points of the compass are always written in capital letters, but if they are spelt out, then they are lowercased: SE, but southeast. Though words representing compass points are lowercased when used to refer to parts of a city, country or continent, capital letters are used if they are part of the name of a recognised geographical or political whole: southern Pakistan and east Delhi, but South Asia and Western Europe.
- Names of historical and cultural events are upcased, but names of periods are sometimes lowercased and sometimes upcased: the Boston Tea Party, the Great Depression, the Kolkata Book Fair, the fifteenth century, the nineteen fifties, the colonial era, but the Christian Era, the Restoration, the Victorian era.
- Names of acts, bills and treaties always start with a capital letter: the Industrial Development Act and the Women's Reservation Bill.

## 5. IDIOMS AND PHRASES

**Idioms and phrases** are an important part of the English language. They are expressions that have a meaning that is different from the literal meanings of the words in the expression. For

example, "I have a lot on my plate" means that you have a lot to do, not that you are eating a lot of food.

### Idioms

Idioms are expressions that cannot be understood literally. For example, if someone says "I'm pulling your leg," they're not actually pulling your leg – they're just joking around. Idioms can be tricky to understand, but they're a fun part of the English language.

### Phrases

We use phrases all the time in English, but what are they? Phrases are two or more words that work together to have a meaning, but they are not complete sentences. They can be a part of a sentence or they can be whole sentences themselves. For example, the phrase "I'm feeling blue" is not a complete sentence, but "I'm feeling blue today"
